that
endures

At d line, we design and craft hardware, sanitary ware and accessories in stainless steel that support life's daily routines. From the lever handle turned as you enter a room to the tap used each morning. Our products are made to be used every single day.

Design

d line — About dline

About d line

Since we began, we have believed that the best ideas respond to a need. This started in the 1960s when the Danish designer Knud Holscher was working under Arne Jacobsen on St. Catherine's College, Oxford. It was his need for a high-quality, coordinated line of stainless steel architectural products that led him to design one.

The d line sanitary range by Knud Holscher combines cleanness in its lines with cleanliness in its function. This series consists of fittings that form a cohesive whole.

Complementary to our Knud Holscher bathroom accessories is our selection of taps and shower fixtures from the Qtoo collection. Realised in the same quality stainless steel and with the same minimalist aesthetic, it is a perfect match to the Knud Holscher collection.

Wherever they appear, our sanitary products can be flexibly combined yet always provide the same uniform impression. In their technical design, installation and maintenance are key focuses, to meet the need for impeccable hygiene no matter how long they live in a space.

To the spaces they occupy, they bring a sense of unity – they are often the finishing touches, yet they are never an afterthought.

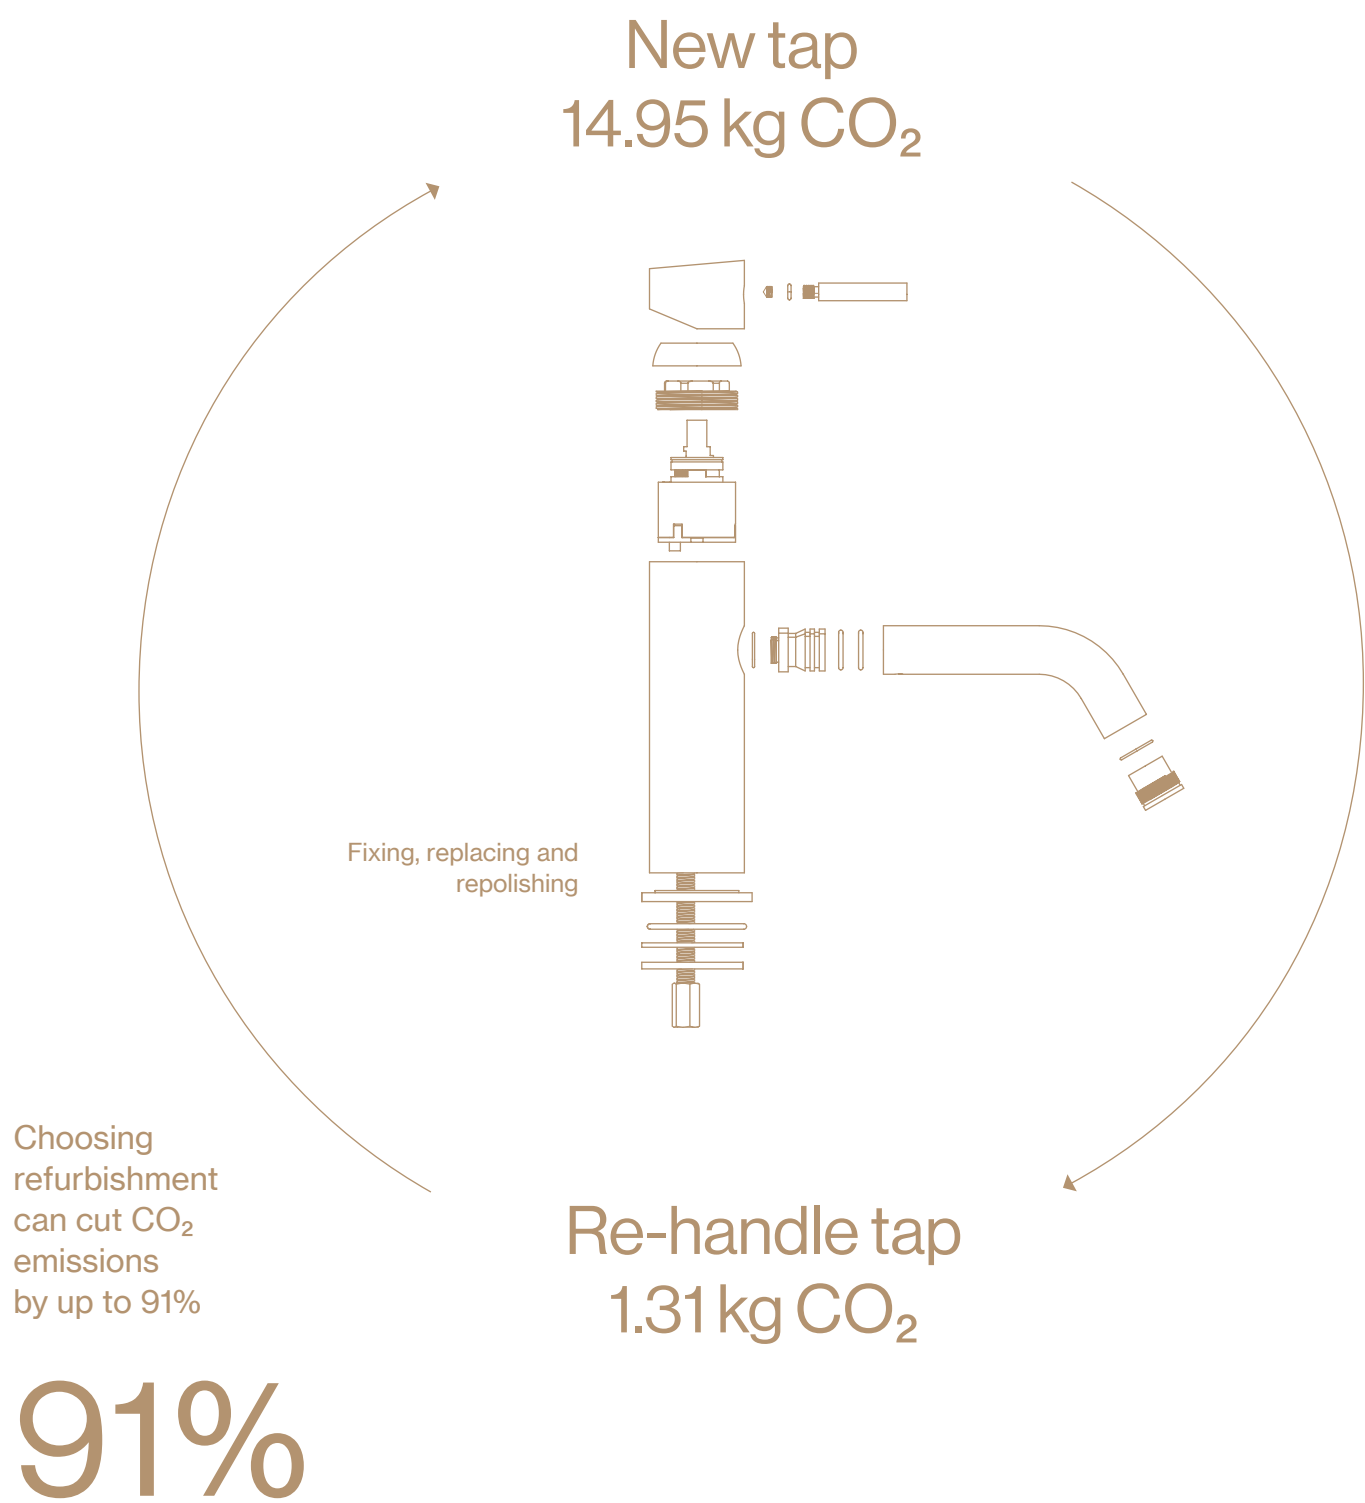

Curated collections: bathroom edition

Our purpose

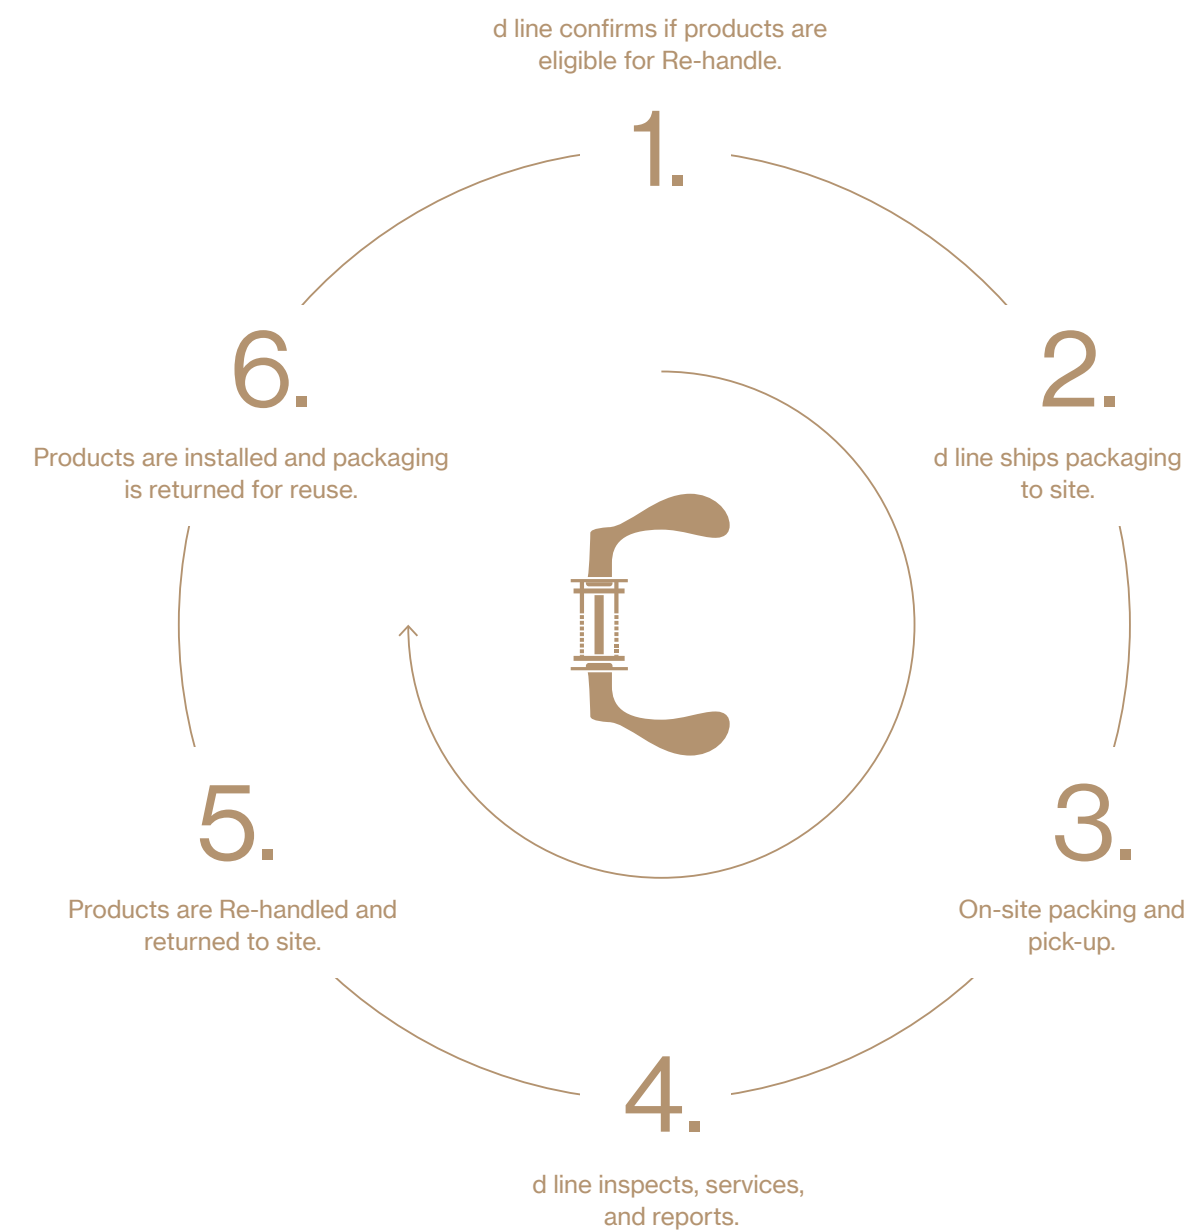

We exist to lead our industry in sustainability by acting with care and producing responsibly.

Re-handle® Circular by design

Re-handle by d line is the industry's first circular service. With the service, we extend the life of our products by replacing parts, repairing, and polishing – so they work and look as good as new.

How it works

- Over 250 products can be Re-handled.
- Lead time: 8 weeks.
- Any quantity can be refurbished, provided it is environmentally responsible.
- Outside of the 250 Re-handle products, we will evaluate any Re-handle enquiry regardless of product or product age.

Why it matters

Nearly 63% of the carbon footprint in our products comes from our choice of material. We use stainless steel for its hygiene, durability, and timeless look. But it's resource intensive to produce. Re-handle is our solution.

It's an easy decision:
Repair instead of replacing.

Stainless steel

AISI 316 stainless steel have long been our choice of material, because it never dates and meets our quality standards. Grinding and polishing methods create our signature d line satin finish. To achieve this finish, a product is gently held by hand against a spinning wheel at specific angles, and with equal pressure applied to every millimetre of the whole.

PVD finishes

Physical vapour deposition (PVD) creates an extremely high-quality and highly durable finish when applied to stainless steel. With it we can create our pieces in PVD copper, PVD black, PVD brass and PVD bronze. This treatment allows for our AISI 316 stainless

steel to take on a new metallic hue, while staying resistant to the humidity and cleaning products typical to bathrooms. Besides our 20-year product guarantee, we offer a 5-year guarantee on the PVD finish.

Qtoo collection

The Qtoo Collection was launched in 2020, to further leverage d line's ability to achieve complete cohesion within spaces. The collection consists of taps and shower solutions in stainless steel and shares d line's precision-based and minimalist design language.

Curated collections: bathroom edition

Curated collections: bathroom edition

Qtoo Collection makes use of marine-quality, non-corrosive AISI 316 stainless steel favoured by d line, utilising steel for both its internal and external parts.

Precision, minimalistic and innovative

Each Qtoo product blends a simple silhouette with innovative ideas, balancing soft shapes with perfectly composed geometric lines.

The Qtoo products are available in brushed and polished stainless steel, as well as PVD brass, PVD copper, PVD black and PVD bronze. With these same finishes applicable to our sanitary ware by Knud Holscher, this means a more comprehensive range across the d line bathroom category.

Sustainable thinking

All materials in a Qtoo product are 100% recyclable. Stainless steel is favoured because the amount of heavy metals are much lower in stainless steel, when compared to chrome products. Simultaneously, in the production

of stainless steel no chemicals are used, nor any contaminating surface treatments.

The Qtoo products further utilizes integrated air mixers as standard to reduce water consumption. The products are CSA certified and conform to California Code, which mean that our products live up to strict water saving standards. Qtoo products also prioritise health, the material is lead-free, allergy-friendly, and certified according to GDV and NSF/ANSI standards, supporting high water quality and low levels of unwanted substances. Each product is covered by a 20-year guarantee, and all taps and showers are supported by Environmental Product Declarations (EPDs).

QS3300-340WM
Built-in two-way shower set in satin stainless steel.

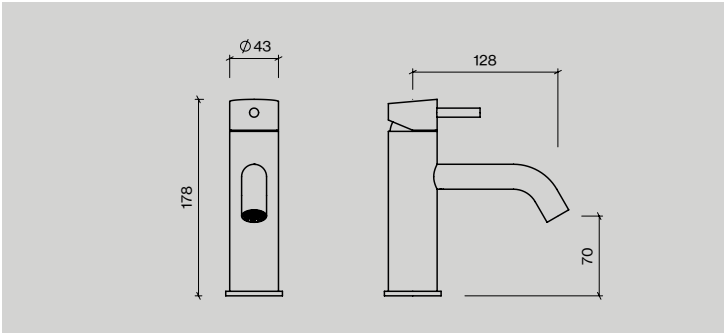

For washbasin

Qtoo washbasin taps are defined by a simple silhouette and a precise, soft operation. The lever moves intuitively and rests in a downward position when turned off to reduce limescale and extend durability.

The design is developed as one continuous form, where spout and body work together in a clean, balanced expression. The range includes solutions for bathrooms, kitchens and specialist basins in multiple heights and installation types.

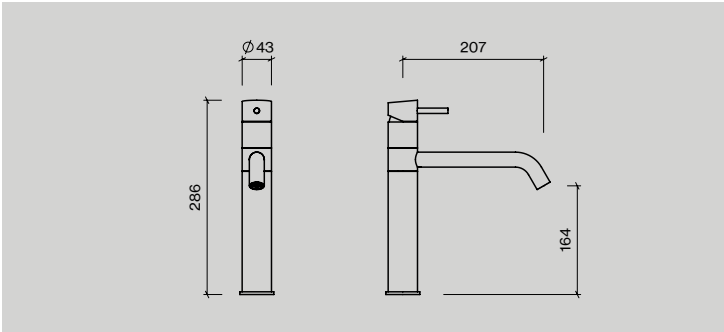

All wall-mounted models are supplied with adjustable built-in units, ensuring precise installation and a stable technical foundation behind the minimalist expression.

Where the waves meet design

Tucked into the sandy dunes of Thy National Park, the Vipp Cold Hawaii Guest House is a peaceful escape for those craving a slower pace. Set on 9,900 m² of untouched land in the small town of Vangså, this modern retreat is surrounded by endless coastline and open skies.

Throughout the space, d line's signature stainless steel products bring a calm, refined touch. The built-in tap and two-way shower from the Qtoo collection — crafted in marine-grade AISI 316 stainless steel — offer a sleek, resilient experience that stands up to the salty air of the coast. On the windows, the classic L handle from the Knud Holscher collection adds subtle design detail with lasting strength.

For shower and bathtub

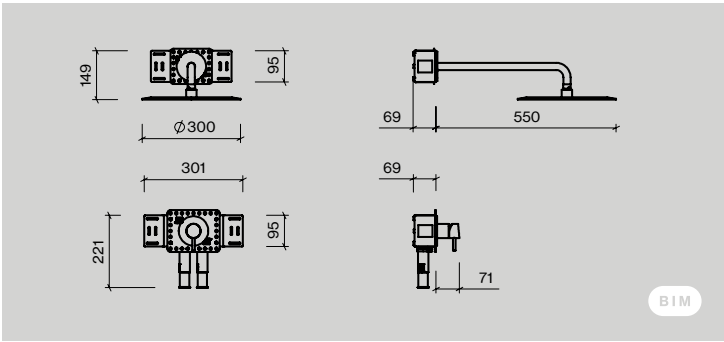

The Qtoo shower and bathtub system is built around modular components that can be freely combined. Shower heads, outlets and control units are designed to function as one coherent system with full visual and functional consistency.

The system is wall-mounted and built-in, where the control units regulate water, temperature and flow. A thermostat can be added for anti-scald protection and enhanced safety.

The one-way and three-way built-in units offer additional flexibility, enabling customised configurations while maintaining visual consistency throughout the system.

Every detail is designed with precision, stable performance and a calm presence within the space.

Design your solution in 3D

Assemble complete bathroom solutions with taps, shower systems and bathtub solutions in just a few clicks. d line's product configurator is developed to simplify complex choices and create greater confidence throughout the specification process – both internally and for project partners.

The configurator allows users to explore solutions in realistic 3D, switch between finishes and build a complete setup tailored to the project. It provides a clear visual overview of the entire solution and shows how each element works together as one coherent system.

An intuitive tool that lets you:

- Explore and visualise our built-in shower solutions in 3D
- Switch between finishes
- See the solution in a physical space using AR
- Save and share your configurations

Set along a peaceful street in Copenhagen, this classic terraced brick house has been gently reimagined into a home that feels both personal and thoughtfully modern. The renovation strikes a careful balance - preserving original charm while introducing contemporary art, warm materials, and timeless details.

Throughout the space, d line products in AISI 316 stainless steel from the Qtoo and Knud Holscher collection, act as the finishing touches, adding quiet sophistication and durability. From room to room, each element has been chosen with care, allowing the house to feel cohesive yet full of personality.

In the bathrooms, d line's signature craftsmanship brings both function and elegance. Satin steel sanitary ware from the Knud Holscher collection meets polished taps and showers from the Qtoo collection, creating a calm, refined expression.

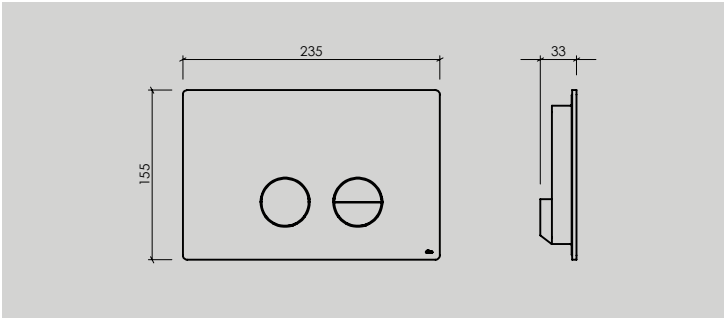

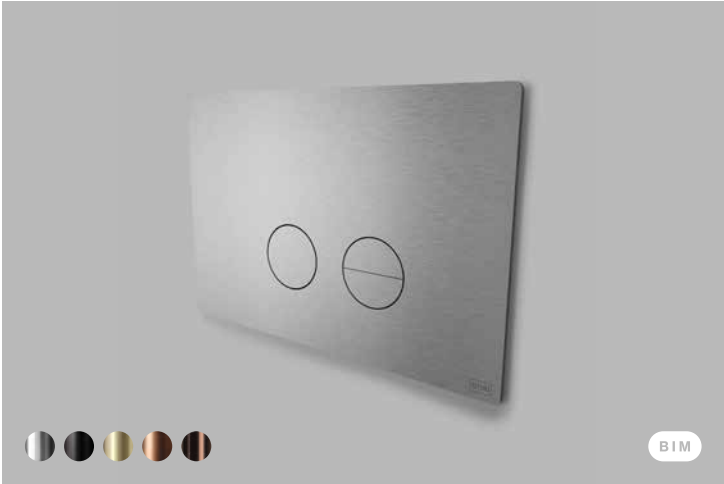

Flush plates

Joining our Qtoo collection of taps and shower fixtures is our take on the perfect flushing plate for your wall hung cisterns.

Staying true to our design principles ours is crafted in AISI 316 stainless steel. This is not only to uphold our 20-year product warranty, but also to offer our flushing plates in the d line colour palette to mix and match with our other collections and products.

We always prefer AISI 316 stainless steel for products in bathrooms, as they can endure high humidity and increased maintenance levels that are often required in these types of spaces. Our flushing plates are compatible with Geberit Duofix Sigma and Omega solutions

Knud Holscher collection

“Architects have a mind for unity.
In terms of design, coherence is the
word; the series forms a unity in
concert with the architecture”
– Knud Holscher

Curated collections: bathroom edition

Curated collections: bathroom edition

The d line sanitary range combines cleanness in its lines with cleanliness in its function, and unlike our hardware collection of individual yet complimentary items, this series consists of fittings that form a cohesive whole.

Functionality, simplicity and quality

Holscher graduated from the Royal Danish Academy of Fine Arts School of Architecture in 1957, having studied under Arne Jacobsen. Only three years later, he found himself working for his professor on St. Catherine's College, Oxford, and thumbing through stacks of brochures to piece together its finishing touches.

As a result of this frustrating exercise, Holscher came to design a series of award-winning, minimalist architectural hardware for d line, starting with the iconic U and L levers, whose characteristic bend would influence the entire product range. This also marked the first time AISI 316 stainless steel was used for hardware, and with it Holscher and d line pioneered the category's first truly enduring products.

Dispensers and bins, bathroom accessories, touchless options and barrier-free solutions make up the sanitary range, which

sits as comfortably in the interior design of private homes as in high-functioning, high-traffic public buildings.

Simple and modular, the d line sanitary range's AISI 316 rust-resistant, non-corrosive, marine quality steel stands up to the high humidity levels of the bathroom, while its subtle curved edges and functional circular hole details are a nod to the bend in our first ever products, the L and U lever handles.

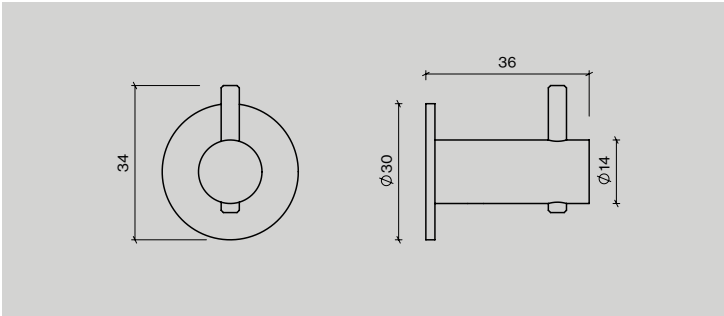

Holscher has won over 70 awards for his designs, including several iF Design Awards that recognise design excellence and date back as far as 1978 and those first lever handles and doorstops for d line, many of which are exhibited at the Design Museum Denmark in Copenhagen.

Bathroom accessories

Like so many of our pieces, the bathroom accessories are characterised both by straight angles and round detailing. Each piece robustly stands up to humidity, cleaning products and years of use.

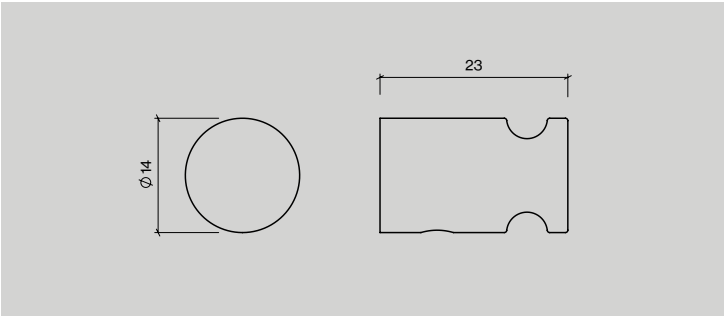

That sense of timelessness sums up our products and how their design is enduring. Because they're minimal and clean-lined enough to fit anywhere – whether a palace privy or a modern-day personal sanctuary.

Dispensers and waste bins

Every piece of our modular dispensers and waste bins features curved edges and hole details a nod to the original bend in the L lever handle that d line is renowned for.

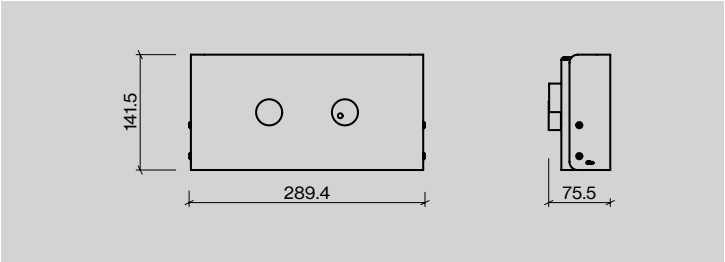

But because our design is not about decorative details, the hole of course has a practical purpose: it's an indicator of when supplies of whatever the piece is holding are running low.

Tissue dispenser

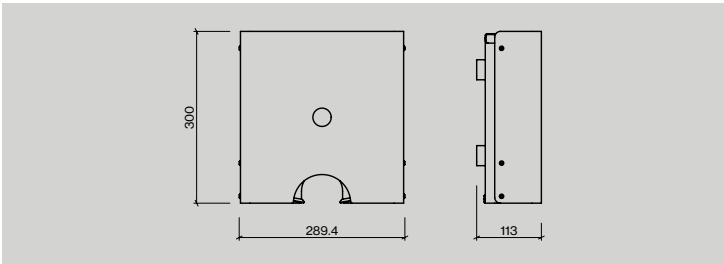

Item no.: 14709102000 14709100000	Description: 285x75x140mm Spare part: paper f/ tissue dispenser	Unit: 1pcs 1 box of 40pcs w/100 tissues each

Unit: 1pcs

Waste bin, Large

Item no.: 14709702340
Description: 40ltr, 350x210x650 mm

Unit: 1pcs

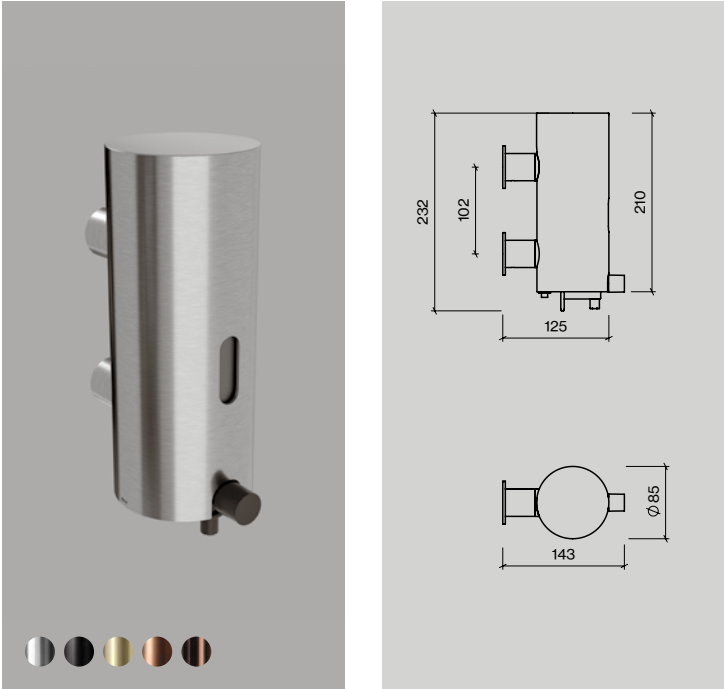

Soap dispensers

Our line of sanitary ware by Knud Holscher is a cohesive group of products in AISI 316 stainless steel, to mix, match and assign various jobs to.

The soap dispensers, traditionally used by bathroom sinks, can also be lined up and wall-mounted in the shower for shampoo, conditioner and shower gel, for a clean, bottle-free bathroom aesthetic.

Our new Touchless soap dispensers by Knud Holscher merges technology with heritage. Realised in AISI 316 stainless steel, these are already-loved pieces from our sanitary ware line, that have been given new functionality and an amplified hygiene factor by being fitted with motion-activated technology. The result? A clean look with cleaner functionality.

Soap dispenser

Item no.:	Description:	Unit:
14704502011	Ø85, 350 ml, w/ indicator f/ soap & disinfectant	1pcs
14704502013	Ø85, 350 ml, w/ indicator f/ foam	1pcs

14704602100	Ø85, 350 ml, w/indicator f/ liquid soap & disinfectant	1pcs

Built-in soap dispenser can be found on page 23

Hand dryers

Our series of cohesive, modular architectural hand dryers designed by Knud Holscher continues the d line curved iconography, with rounded edges and functional hole detailing, yet they also embrace the latest innovations in motion-sensor technology.

Hand dryer

Item no.:	Description:	Unit:
14708202020	w/ HEPA filter, 277x285x126 mm, 220-240V	1pcs

Barrier-free

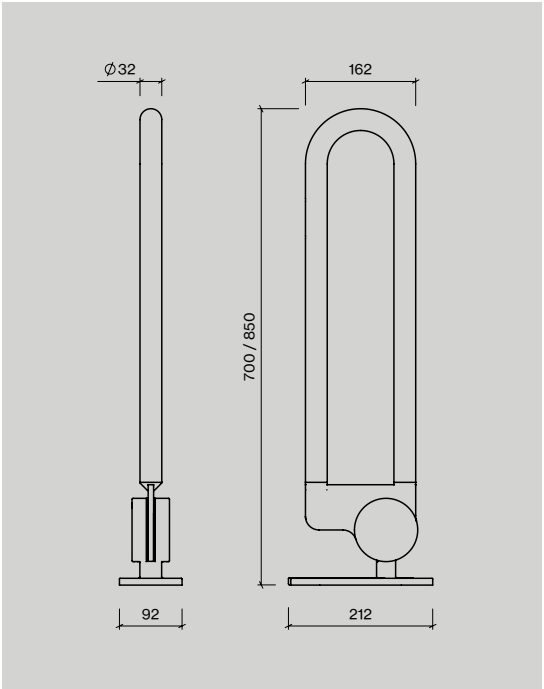

d line's move into barrier-free is about enabling people, and as with many of the products we design, our leap into this important new area started with a need.

The range serves both the disabled community and helps the elderly remain in their homes in a way that is discreet and understated. Like our other categories, our barrier-free products fuse aesthetics and functionality.

Extensive user testing has shown a great need for products in this category that look good, so we have created them with features such as user-friendly operation; different colour options for easy detection by the visually impaired; and warmth to their touch to avoid causing pain to arthritis sufferers (the foldable seat).

Our solutions within barrier-free further extends into hardware and taps and shower fixtures. Combine our pieces from the Knud Holscher and Qtoo collections of barrier-free items to create safe spaces for the less abled.

Features: The PU-foam used for the foldable seat is REACH-conform.
Tested according to: BS EN 12812:2012, §16.2 and §16.3.
Max. load: 150 kg.

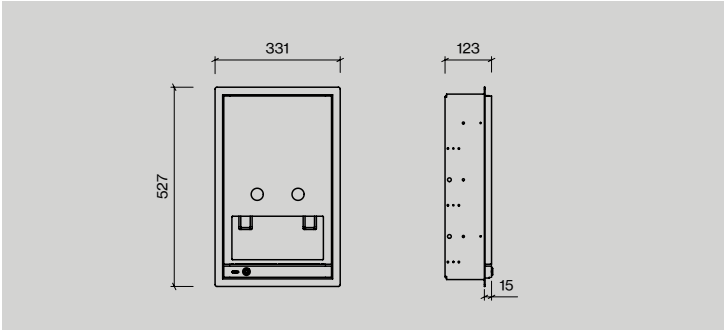

Sanitary panels

For the panel system, elements are combined within a single frame. Choose between 11 standard combinations, that offer a variety of solutions required to maintain a fully functioning, high traffic washroom. It's why everything is created in AISI 316 rust-resistant, non-corrosive, marine quality steel, which stands up to the high humidity levels of the bathroom – and its daily maintenance.

Installation of the system, pioneered over years of technical design development, takes a maximum of 20 minutes and its onepoint locking mechanism allows for cleaning and refilling every module at the turn of a single key.

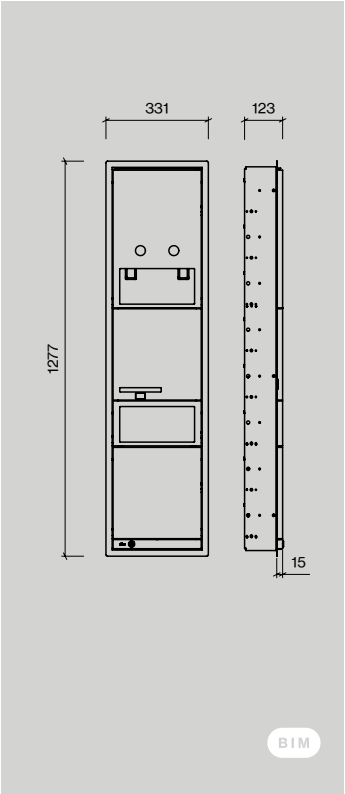

Now there are even more variations to the system's design, as each panel is available in our PVD and powder coated finishes.

Recessed paper dispenser, sanitary panel H

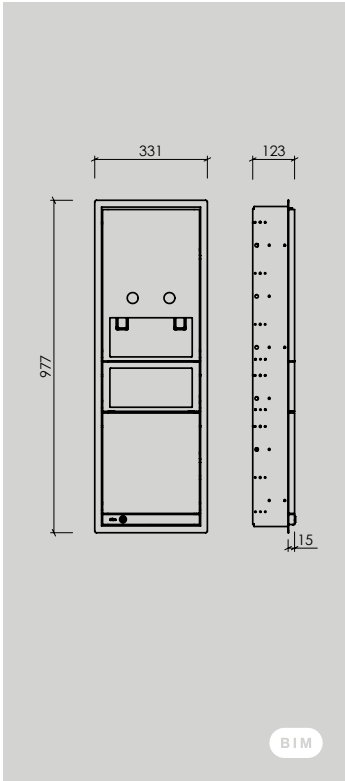

Item no.:	Description:	Unit:
14710003002	Paper dispenser	1pcs
14708000000	Spare part: paper f/paper towel dispenser, 2 layers interfolded	1pcs

Luke Arthur Wells, British interior designer and DIY expert, has created a stunning bathroom setup with pieces in charcoal from the Qtoo and Knud Holscher collections. The result is understated, yet impactful balancing soft shapes, natural materials and graphic contrasts to the interior.

Luke has great attention to detail and the sand coloured, rounded sink paired with the off-white walls creates a beautiful tone-on-tone effect. The rich charcoal hue of the built-in tap and sanitary ware is a refreshing contrast and the light background makes them pop a little extra.
