

Case study

A Scandinavian summer dream

Clean lines and a soft colour palette, makes this summer house a modern, scandinavian dream. The house is located in beautiful Gilleleje, and was decorated by danish interior designer and influencer Emil Thorup.

The bathroom is attired with products in brushed steel from the Qtoo collection, and the minimalistic design is an immaculate match with the aesthetic expression of the house. The two way shower has been used to create an incredible double shower, with a beautiful light incidence. The built-in tap, is an exquisite detail for the rounded wash basin.

"My work is primarily based on a design/quality/price efficiency analysis, where the Qtoo products from d line have a top score. Design-wise the level is very high. Regarding the quality, I can't mention any other Danish brand that reaches the same level, and the price is perfect considering the luxury and quality feeling of the product." – Emil Thorup

.

About d line

d line is a heritage Danish design brand conceiving and hand crafting enduring architectural hardware, sanitary ware and solutions for barrier-free living.

Launched in 1971 with the coordinated line of stainless steel architectural products Knud Holscher created for St Catherine's College Oxford, d line has since collaborated with iconic Danish designers including Arne Jacobsen. The brand's ambition is to be universally known, coveted and admired for the uncompromising endurance of its design, craftsmanship and quality.

About the Qtoo collection

The Qtoo Collection was launched in 2020, to further leverage d line's ability to achieve complete cohesion within architect-designed spaces. The collection brings to the market stainless steel taps and shower fixtures, which share our precision-designed, minimalist aesthetic.

Staying true to our sustainability principles, the Qtoo collection is realised inside and out in stainless steel, each product is 100% recyclable and comes with a 20-year guarantee.

Precision-designed to the simple ethos of: 'form follows function', the Qtoo Collection is founded on an established collaboration with award-winning Danish design studio, Hans Thyge & Co. The pieces blend minimalistic silhouettes with innovative ideas, balancing soft, feminine shapes with perfectly composed geometric lines.

Presented within the d line offer as the Qtoo Collection, the products fold seamlessly into our other collections, because every Qtoo piece behaves in a similar way: their minimal aesthetic, curved details and high-quality, resilient material mean they can be mixed and matched with everything across the brand, to achieve a unique look that's always perfectly cohesive.

.

On sustainable standards

Qtoo makes use of marine-quality, non-corrosive AISI 316 stainless steel favoured by us, utilising steel for both its internal and external parts. We prioritise the use of stainless steel in the production of our taps and shower fixtures due its recyclability and the lower amount of heavy metals, when compared to normal chrome products. In the production of stainless steel no chemicals are used, nor any contaminating surface treatments. The material is so durable, that every single product in the collection is guaranteed for 20 years.

When you've used the product for the purpose you've bought it for, we have ensured that nothing goes to waste. Each Qtoo product can be taken a part with standard tools and be 100% recycled, as a way to repurpose, reuse and avoid unnecessary waste.

The Qtoo products further utilizes integrated air mixers as standard to reduce water consumption. The products are CSA certified and conforms to California Code, which mean that our products live up to strict water saving standards.

Notes to editors

Interior designer: Emil Thorup

Location: Copenhagen, Denmark

Year: 2020

Product attributes:

- 20-year guarantee
- High quality stainless steel AISI 316 (non-corrosive and highly durable)
- Each product is 100% recyclable
- Several colours and finishes for different aesthetics, choose between the following finishes in both polished and brushed: steel , brass, copper, black
